

Obinna (Obi) Uzozie

Full-Stack Developer & UX/UI Designer

Hong Kong (Right to Work in HK) | uzozie.obi@icloud.com

LinkedIn: [linkedin.com/in/obie-u-194942207](https://www.linkedin.com/in/obie-u-194942207) | GitHub: github.com/uzoziealpha | Portfolio: obi-portfolio-flame.vercel.app

SUMMARY

Hong Kong-based Full-Stack Developer with a strong foundation in UX/UI Design. Specializes in bridging the gap between creative concepts and technical execution, taking projects from high-fidelity Figma prototypes to shipped React/TypeScript applications. Experienced in building responsive e-commerce platforms and intuitive Web3 interfaces, with a focus on clean code, component systems, and user-centric design principles.

LANGUAGES

English: Native / Fluent

TECHNICAL SKILLS

Frontend Development: React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Vite, Responsive UI Design, Web Accessibility (a11y).

UX/UI Design: Figma (Prototyping, Auto Layout, Component Libraries), Wireframing, User Flow Mapping, Adobe CC (Photoshop, Illustrator).

Backend & Infrastructure: Node.js, RESTful APIs, Python (Data Prep), Basic SQL, Git/GitHub Workflow, Vercel/Netlify Deployments.

Web3 Integration: Web3.js/Ethers.js, MetaMask Wallet-Connect UX, Smart Contract Interaction (Solidity basics).

Data Visualization: Tableau, Power BI (Dashboard Design & KPI Reporting).

SELECTED PROJECTS

Vérité Sauvage — Web3 Authenticity & UX Portal | Live Link: verite-sauvage-verify-frontend.vercel.app

- **Design:** Architected end-to-end user journeys in Figma to simplify complex Web3 wallet connections for non-technical users, prioritizing a mobile-first approach.
- **Build:** Developed a responsive front-end using React and Tailwind CSS, integrating MetaMask APIs to create a secure, QR-based product verification flow.

Calm Candles Essential — Custom Shopify E-commerce Platform | Live Link: calmcandleessential.store

- **Design:** Led UX and UI design for a conversion-focused storefront, creating brand assets and intuitive product navigation.
- **Build:** Implemented a custom Shopify theme using Liquid, HTML, CSS, and JavaScript to realize the design vision with SEO structure and responsive performance.

HKMA Liquidity Monitor — Interactive Financial Dashboard (Tableau) | Live Link: public.tableau.com/app/profile/obinna.uzozie8626/viz/HKMALiquidityMonitorAggregateBalance/HKMALiquidityMonitorAggregateBalance?publish=yes

- Translated complex HKMA financial data into an interactive Tableau dashboard, designing intuitive visualizations for aggregate balance trends to support rapid data analysis.

PROFESSIONAL EXPERIENCE

Lead Full-Stack Developer & E-commerce Manager

Calm Candles Essential (Hong Kong) | 2022–Present

- Direct the technical strategy and end-to-end development of the brand's D2C Shopify platform, serving the Hong Kong market.
- Engineer custom front-end solutions using JavaScript and Liquid to enhance UX, improving site navigation and mobile responsiveness.
- Produce creative assets for Reels/TikTok campaigns, ensuring consistency between marketing visuals and the on-site experience.
- Manage cross-border supplier communications to ensure product quality standards match digital representation requirements.

Full-Stack & Web3 Product Lead

Vérité Sauvage (Hong Kong) | 2022–Present

- Spearhead product design and front-end development of a blockchain-based authenticity verification tool.
- Translate requirements into technical specifications, designing UI components in Figma and implementing them in React/TypeScript.
- Develop secure MetaMask wallet interaction flows, lowering the barrier to entry for customers engaging with Web3 technology.

Freelance Business Intelligence Analyst

Various Clients (Hong Kong) | 2024–Present

- Design and deploy interactive dashboards using Tableau and Power BI to visualize key performance indicators (KPIs) for stakeholders.
- Transform raw datasets into clear, actionable visual narratives to support data-driven decision-making.

Native English Teacher

Hong Kong | Mar 2021–Present

- Deliver structured lessons in phonics, grammar, speaking, and reading for primary learners, adapting materials to varied proficiency levels.
- Create engaging classroom content and homework resources using PowerPoint and modern instructional design practices.
- Use generative AI tools (e.g., Midjourney) to produce high-quality visual aids that improve student attention and comprehension.
- Track learning progress, write term reports, and communicate outcomes and next steps to parents/guardians.

EDUCATION

Software Engineering Bootcamp (2-year program) | AltCademy (Ruby, JavaScript, Python, React focus)

B.A. in Accounting | Texas Southern University, 2012

CERTIFICATIONS

Amazon Ads Retail Certification — Amazon | Issued Feb 2024
